There doesn't appear to be an issue in any one specific build phase, it is across the board and affects private, housing association and developer properties.</p> <p><u>Clarion Buildings</u> Clarion are upgrading this within their blocks to give one-hour fire safety, which means that specific internal walls have to be padded out with an extra layer for fire tar dent.</p> <p>In the event of a fire, this will give the fire brigade half an hour to get resident out and a further half hour for them to deal with the safety of the building.</p> <p>Clarion will be paying a contribution towards resident's costs to move into a hotel or find alternative accommodation. Clarion are putting their residents first in managing this situation.</p> <p><u>Crest Buildings</u></p>
